

Press Release:

Business Industrial Network helps you compete in a rapidly changing manufacturing technology arena. Manufacturing equipment will break down, and you need to recover as quick as possible to remain competitive. The more resources you have to recover from a breakdown, the better you will be prepared to meet delivery schedules.

Business Industrial Network is a management consulting and information retrieval service provider. Manufacturing equipment technology is evolving quicker than any maintenance/engineering personnel can keep up with. **BIN95.com** provides the technical information needed to repair downed equipment through Internet research, and networking with thousands of OEMs, Organizations, and maintenance/engineering contacts. Our Engineers work on getting maintenance departments the information they need, while they address other issues in their facility.

*Below is the resource information for **BIN95.com WEB site**, try the Quick Help service for **free**.*

Organization Name: Business Industrial Network

Organization URL: <http://www.bin95.com/>

Public email address: webmaster@bin95.com

Description: Business Industrial Network eliminates unnecessary equipment downtime by providing online engineering and maintenance technical support. Submit a question and it will page an engineer for immediate response by a human.

Thanks

Don Fitchett
